

## Dynamically disinfecting the air we breathe and the surfaces we touch

with the combination of organic and natural Hydroxyls and Ions.

### THERE ARE MANY AREAS WITHIN A BUILDING WHERE SOCIAL DISTANCING IS SIMPLY NOT POSSIBLE, THE MOST OBVIOUS OF WHICH IS AN ELEVATOR

- The Safespace elevator range technology can remove up to 99.99% of airborne microbes in minutes
- Designed using the elevator expertise of Formula systems and proficiency in infection control technology from AIRsteril
- The most advanced viral and bacterial control technology of its kind
- Constantly reduce contamination both in the air and on surfaces within an elevator car
- Control harmful bacteria and viruses 24 hours a day, 365 days a year

---

### COMMON PROBLEMS

Elevators are a key requirement in multi-storey buildings and measures like social distancing and regular cleaning can create long delays. Cleaning is often impractical during the busiest periods and cannot prevent airborne infections.

Viruses, bacteria, allergens and mould are constantly present in the air around us, with the design of many buildings and air handling systems increasing the chances of them being distributed across wide areas. High numbers of individuals can pass through an elevator in a working day. The more people passing through an area, the higher risk of infections spreading which increases absenteeism and associated costs.

A person unknowingly harbouring an airborne infection can spread the associated risk over a large area. Individuals who can be conscious of not coughing or sneezing in more public areas may be much less concerned about the same activities in "unseen areas" like an elevator which is another reason controlling microorganisms here is an essential part of any company's infection control strategy.

**The most advanced  
elevator car disinfection  
technology proven to  
kill harmful viruses and  
bacteria**

# The Healthy Air Solution

## DYNAMICALLY DISINFECTING THE AIR WE BREATHE AND THE SURFACES WE TOUCH

- Kills pathogens (bacteria, fungi and viruses including common cold and flu, COVID-19, influenza, stomach flu, legionella, Methicillin Resistant Staphylococcus Aureus (MRSA), Escherichia coli, Klebsiella pneumoniae and Pseudomonas aeruginosa.)
- Kills mould and mould spores.
- Removes Particulate Matter (PM2.5 & PM10).
- Removes Volatile Organic Compounds (VOCs).
- Safe to use around people, animals and plants.
- Offers continuous cost effective protection 24/7.
- Simple to install.
- Chemical and filter free. does not require expensive filter replacements e.g. HEPA filters.

## AIRSTERIL IS

- Chemical free.
- Filter free. does not require expensive filter replacements e.g. HEPA filters.
- Independently laboratory tested.
- Safe and environmentally responsible.

Visit [www.fortressair.com.au](http://www.fortressair.com.au) to view our full product range.

## PROVEN BENEFITS

- Proven to kill viruses and bacteria
- Eliminate unpleasant odours
- Enhanced protection for both staff and visitors Fan driven for consistent performance
- Safe and suitable for use in enclosed areas of continuous occupation
- Single unit offers coverage of up to 18m<sup>3</sup> Maintenance only once per year
- Technology proven to reduce absenteeism LED indicator confirms correct unit operation and advises when lamp change required

**Fortress AIR Solutions are the next generation technology of innovative solutions for indoor air quality**

Representing a step change in indoor air quality management with the introduction of Free Hydroxyl Radicals as well as Ions
